Swimmingly Information

For Help:

<https://support.swimmingly.app>

New for the season:

## Access the QR-Code for our meet?

Access your QR-Code before the meet, during the huddle, or during your swim meet on your Scorekeeper's iPad

### Given That

I am at the swim meet and need to synchronize devices (swim meet huddle)

### I Want To

Access the Meet QR-Code

### Solution

Access the QR-Code on your Scorekeeper's iPad during the huddle or once the swim meet is in progress

The **Meet QR-Code** will be scanned by any Starter, Timer, or Stroke & Turn Judge that needs to synchronize to the swim meet. This QR-Code is consistently changing so only the volunteers you want to huddle in the swim meet are able to do so.

Please make sure all volunteers have updated their **Swimmingly App to Version 10.0!**

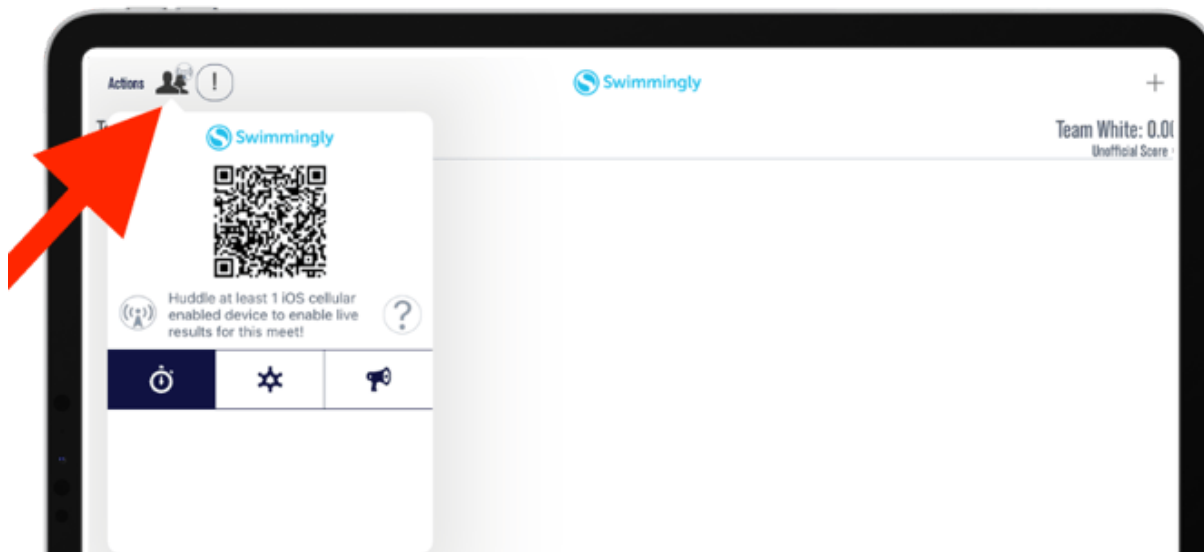

### Locating the Meet QR-Code *during the swim meet huddle:*

- On the Scorekeeper, the QR-Code is located on the **huddle screen** during the huddle.
  - This is helpful as your Scorekeeper can physically share the screen with the Starter, Timers, and Judges attempting to huddle their devices:

### Locating the Meet QR-Code *once the swim meet has begun*:

- On the Scorekeeper, the Meet QR-Code is located on the **device viewer** during the swim meet.
- Tap on the **device viewer**
  - This is helpful as your Scorekeeper can share the QR-Code with new Timers without having to restart the Scorekeeper

This is helpful if your club has 1st and 2nd half timers. The Scorekeeper can **share the QR-Code with 2nd half timers without having to quit the app or delay the swim meet.**
